To learn more about
Magnatex® Pumps

Magnatex® Pumps, Inc. offers a new line of Quartz Ceramic Cast Magnachem™ Baseplates for long service life and perfect alignment every time. Every Magnatex® Pump is laser aligned before it leaves the factory.

Compared to fabricated steel baseplates, Magnachem™ Baseplates:

- Are flat to within .002"/ft which ensures perfect pump and motor alignment every time
- Feature completely rigid quartz ceramic cast construction
- Provide a broad range of chemical resistance
- Cost significantly less

Magnachem™ Baseplates include:

- Threaded grout holes for easy installation
- A drip rim around the entire baseplate for effective containment
- A catch basin with a threaded drain connection under the pump stuffing box/seal chamber area to safely transfer controlled leakage
- Tapped thru holes in each corner of the baseplate to facilitate stilt mount installations
